

BalanceBox® Tilt
for collaborative working

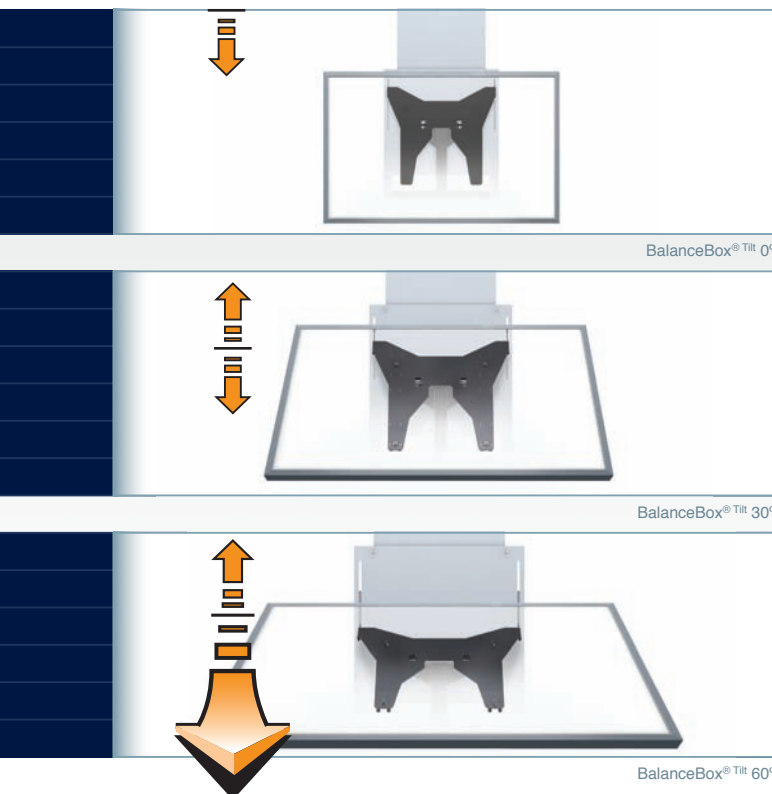

Thomas Regout International B.V. offers a broad range of linear motion solutions that help move your application in any direction: horizontal, vertical and diagonal.

Challenge us, in any way. Based on its 180 years' experience in linear motion solutions, Thomas Regout International B.V. offers a range of high quality products for use with large touchscreen displays and interactive whiteboard systems. In our challenge to offer you a comfortable and intuitive solution to adjust your screen vertically, we have developed the BalanceBox®, a user-friendly, ergonomic, high-quality, reliable and sustainable product that allows you to move your screen up and down, and even tilt, in a manual way.

BalanceBox® Tilt for collaborative working

The BalanceBox® Tilt is a new product in the range and adds a weightless and intuitive manual tilt feature to the up-down movement. A 55 inch touchscreen can be tilted 60 degrees to allow multiple users in a working or teaching situation to work together. Move the screen with no effort at all, to create an intimate and comfortable environment. Both a floor support for safe mounting on non-supporting walls and a mobile stand are part of the product range.

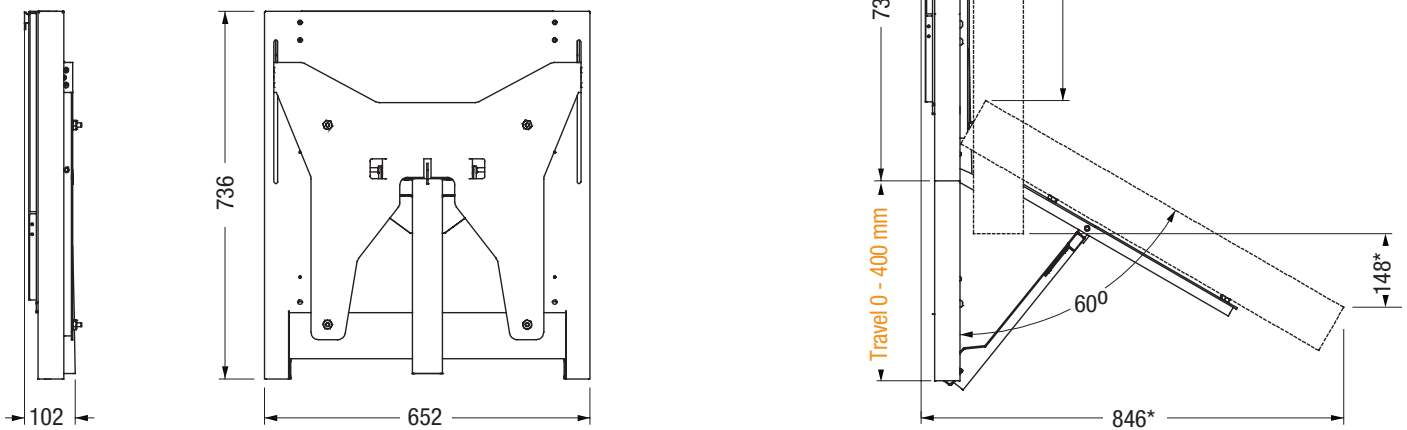

features and benefits

- 1 Ergonomics; smooth, effortless, intuitive
- 2 Compact design; hidden behind the screen
- 3 400 mm High-low adjustment and 60 degrees tilt
- 4 Safety; can be used by both adults and children
- 5 No motor, no power connection needed
- 6 Extremely reliable; tested to 60.000 cycles (10 years of usage)
- 7 Fast and easy installation; maintenance free
- 8 Low transportation costs
- 9 Green; fully recyclable, no power consumption, long service life
- 10 No maintenance needed
